

AYESHA BI

DevOps Engineer | Cloud & Infrastructure Automation | CI/CD | AWS

ayeshabi2004@gmail.com • +91 7619654376 • Kengeri, Bangalore • [linkedin.com/in/ayesha-bi-873a0233a](https://www.linkedin.com/in/ayesha-bi-873a0233a)

PROFESSIONAL SUMMARY

DevOps-focused fresher with hands-on experience in Linux, Shell Scripting, Git, Docker, Kubernetes, Terraform, and AWS. Built and deployed an end-to-end DevOps project involving containerization, Kubernetes application deployment, infrastructure provisioning, and cloud monitoring.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, CloudWatch)

Infrastructure as code : Terraform

Containerization & Orchestration: Docker, Kubernetes

Version Control: Git, GitHub

Scripting: Bash / Shell Scripting

Operating Systems: Linux (Ubuntu)

Soft Skills: Team Collaboration, Problem-Solving, Communication, Debugging

PROJECT (<https://ayesha-bi.github.io/devops/index.html>)

CloudForge — End-to-End DevOps Automation & Application Deployment

Purpose: Automate application deployment and AWS infrastructure management using DevOps tools.

Technologies: Linux, Bash, Git/GitHub, Docker, Kubernetes, PostgreSQL, Terraform, AWS (EC2, VPC, IAM, S3, CloudWatch).

- Containerized and deployed the application using Docker and Kubernetes.
- Automated deployment using Bash scripting.
- Implemented IaC with Terraform for AWS infrastructure.
- Configured PostgreSQL on Kubernetes and CloudWatch monitoring.

INTERSHIP EXPERIENCE

AWS & DevOps Intern | MNP Technologies • Bangalore

- Designed and automated cloud infrastructure using Terraform and Ansible, reducing manual provisioning time and improving deployment consistency.
- Built and maintained CI/CD pipelines in Jenkins to automate build, test, and deployment workflows, supporting faster software delivery cycles.
- Worked with Docker and Kubernetes to containerize applications and manage orchestration for consistent and scalable deployments.
- Configured monitoring dashboards using Prometheus to track system health, set up alerting rules, and improve observability across services.
- Managed AWS services (EC2, S3, IAM, VPC, CloudWatch) for cloud environment setup, access control, and resource monitoring.
- Automated repetitive Linux tasks using Bash shell scripts, improving operational efficiency.
- Collaborated with cross-functional teams in an Agile environment, participating in code reviews and contributing to DevOps best practices.

EDUCATION

Bachelor of Computer Applications (BCA) | 2021 – 2024
